## Experience

---

### SoftServer

Lviv, Ukraine

SOFTWARE ENGINEERING TRAINEE

November 2018 - February 2019

- Working in a team as a full-stack Django + React developer, with main focus on learning, in creation of project WayToHome

### Vakoms

Lviv, Ukraine

JUNIOR PYTHON WEB DEVELOPER

Apr. 2019 - Currently

- Working on the back-end of organization's startup website, with functionality to configure products in 3D environment. Implementing new features, tests, refactoring old and redundant code, all independently.

## Projects

---

### WayToHome

- A website that provides notifications about desired public transport arriving, at designated by user time. Notifications sent via sms and telegram bot.
- Done in Django(Python 3.7) + React using PostgreSQL fully, with some use of Redis, Celery, Rabbitmq. Deployed with Docker.

### GFG

- Website for furniture company, with functionality to configure products in 3D environment.
- Done in Django(Python 2.7) + Angular, on PostgreSQL, with use of Redis, django-channels. Strong lean towards performance optimisation and security.

## Education

---

### National University 'Lviv Polytechnic'

Lviv, Ukraine

BACHELOR OF SCIENCE IN COMPUTER SCIENCE (UNFINISHED)

September 2015 - May 2019

- Automated Control Systems department
