1 What Makes Me Good At Math

What makes me good at math is that I am a very structured person that thinks of ways to solve problems in logical ways. I have always enjoyed the fact that in math there is almost always more than one way to get an answer. I am a good problem solver when it comes to everyday things because I like to look at things in mathematical ways.

2 What Stops Me From Being Better At Math

What stops me from getting better at math is the fact that I am a student athlete, and it consumes a lot of my time. Therefore, I don't get to spend as much time on math as I sometimes need to. Also, I am not as organized as I would like to be, which could help me a lot on my math work from getting from point A to point B. All in all, I am happy with my work ethic, but sometimes I need to think smarter instead of longer.
