

Title of the PhD Thesis

Author Name

Submitted to the
Institute of Graduate Studies and Research
in partial fulfillment of the requirements for the degree of

Doctor of Philosophy
in
Physics

Eastern Mediterranean University
June 2016
Gazimağusa, North Cyprus

Approval of the Institute of Graduate Studies and Research

Prof. Dr. Cem Tanova
Acting Director

I certify that this thesis satisfies the requirements as a thesis for the degree of Doctor of Philosophy in Physics.

CHAIR OF DEPT
Chair, Department of Physics

We certify that we have read this thesis and that in our opinion, it is fully adequate, in scope and quality, as a thesis of the degree of Doctor of Philosophy in Physics.

LIST OF FIGURES

Chapter 1

INTRODUCTION

1.1 General Relativity

General relativity (GR, also known as the general theory of relativity or GTR) is the geometric theory of gravitation published by Albert Einstein in 1915 and the current description of gravitation in modern physics. [1]

$$G_{\mu\nu} = 8\pi G T_{\mu\nu} \quad (1.1)$$

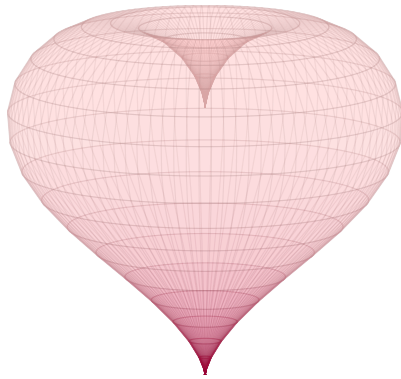

where G is the Newton constant, $G_{\mu\nu}$.

$$\begin{aligned} \sum |M_g^{\text{viol}}|^2 &= g_S^{2n-4} (Q^2) N^{n-2} (N^2 - 1) \\ &\times \left(\sum_{i < j} \right) \sum_{\text{perm}} \frac{1}{S_{12}} \frac{1}{S_{12}} \sum_{\tau} c_{\tau}^f. \end{aligned} \quad (1.2)$$

Make Plots with latex

List are really easy to create

- One entry in the list
- Another entry in the list

$$x^n + y^n = z^n$$

In physics, the mass-energy equivalence is stated by the equation $E = mc^2$, discovered in 1905 by Albert Einstein.
