Title of your discussion paper

First Author Name[a][*], Second Author Name[bc], etc.[ac]

[a]Department, University, City, Country
[b]Department, University, City, Country
[c]Department, University, City, Country

[*]Corresponding author: first name, initials, surname; `email.address`

Discussion paper

Abstract

A short (up to 250 words) summary of the main contributions of the paper and the context of the research.

Keywords: keyword 1; keyword 2; lower case except names, max 6

Author roles: For determining author roles, please use following taxonomy: https://credit.niso.org/. Please list the roles for each author.

Discussion papers illustrate methods, challenges, and limitations in the creation, collection, management, access, processing, or analysis of data in humanities research, including standards and formats. These aspects must not necessarily be discussed with reference to a specific dataset (or collection thereof) but, if your paper focusses on particular datasets, we advise to add the dataset metadata under the section 'Dataset description'. Discussion papers have a word limit of 3,000-5,000 words, excluding title, author affiliations, abstract, Tables/Figures and references, but including Tables/Figures captions and footnotes. This template provides a general outline for discussion papers and authors can adapt the headings and include subheadings as they find appropriate. Please delete or replace the text not given in bold with your own text.

Authors must ensure that the manuscript text, including the abstract, is original and not directly taken from dataset repository descriptions. The text must be paraphrased and adapted to fit the context of the article.

1 Context and motivation

Describe the context and motivation of your paper.

1.1 In-text citations

This journal uses a style based on the APA system (see here).
The following are some basic citation commands in LaTeX:

`\citet` → Jenset and McGillivray (2017)
`\citet` → Australian Institute of Health and Welfare (2011)
`\citet` → Shree et al. (2019)
`\citep` → (Fabricius-Hansen & Haug, 2012)
`\citealp` → (Eckhoff et al., 2018)
`\citealp` → (Eckhoff et al., 2018; Fabricius-Hansen & Haug, 2012; Shree et al., 2019)

1.1.1 Other simple functions

To add bullet points:

- Some point
- Another point

Or numbered points:

1. Some numbered point
2. Another numbered point

This is an example of footnote[1].

This is a simple table:

Table 1: A caption.

1	2	3	4
a	b	c	d
e	f	g	h

Please refer to your table using: Table 1.

To add a figure, upload the figure into the `images` folder, and then embed it:

Figure 1: JOHD's logo.

To resize the figure:

Figure 2: JOHD's logo.

Figure 3: JOHD's logo.

Please refer to your figures as: Figure 1, Figure 2, etc.

2 Dataset description

Here you can provide, if applicable, information about the dataset(s) whose creation, collection, management, access, processing or analysis have been discussed in this paper, following this schema:

Repository location   A DOI of the openly available dataset being described is required.

Repository name   The name of the repository to which the data is uploaded. E.g., Figshare, Dataverse, etc.

Object name   Typically the name of the file or file set in the repository.

---

[1] This is a footnote

Format names and versions E.g., ASCII, CSV, Autocad, EPS, JPEG, Excel, SQL, etc.

Creation dates The start and end dates of when the data was created (YYYY-MM-DD).

Dataset creators Please list anyone who helped to create the dataset (who may or may not be an author of the data paper), including their roles (using and affiliations).

Language Languages used in the dataset (i.e., for variable names etc.).

License The open license under which the data has been deposited (e.g., CC0).

Publication date If already known, the date in which the dataset was published in the repository (YYYY-MM-DD).

3 Method

Describe the methods used in the study.

4 Results and discussion

Describe and discuss the results of the study.

5 Implications/Applications

Provide information about the implications of this research and/or how it can be applied.

Acknowledgements

Please add any relevant acknowledgements to anyone else that assisted with the project in which the data was created but did not work directly on the data itself.

Funding Statement

If the research resulted from funded research please list the funder and grant number here.

Competing interests

If any of the authors have any competing interests then these must be declared. If there are no competing interests to declare then the following statement should be present: The author(s) has/have no competing interests to declare.

Supplementary Files (optional)

Any supplementary/additional files that should link to the main publication must be listed, with a corresponding number, title and option description. Supplementary files should also be cited in the main text. Note: supplementary files will not be typeset so they must be provided in their final form. They will be assigned a DOI and linked to from the publication.
